Strategies for ELs & Struggling Learners

ADRIAN MENDOZA

began his journey in education teaching English learners (adults and children) in

Monterrey, Mexico, more than 10 years ago, where he discovered his passion for education. When he moved to Texas to teach 5th Grade in a bilingual classroom, he understood the importance of the language and the culture in order to inspire students to achieve their best academically.

Adrian joins Seidlitz Education from his previous role as an Instructional Math Coach in San Marcos CISD with a Master's Degree in Educational Leadership at Texas State University. His commitment leads him to innovate in the education area, and his present action research project is about the importance of Building Mathematical Growth Mindset Communities.

Adrian has provided Professional Development to educators in districts and educational service centers across the state for more than 5 years in the areas of Bilingual Education, Math, Science, Technology, and Student Engagement, working with teachers and parents in United States, Mexico, and Costa Rica.

Are you ready to provide sheltered instructional strategies to engage your ELLs and ALL students in your math classroom? This language-rich interactive workshop will be focused on mathematical processes that our students need to acquire and demonstrate mathematical understanding. Participants will be provided with hands-on and classroom-ready activities that bridge concrete, pictorial, and abstract representations using research-based mathematical mindset principles..

Participants will explore:

- Structured Math Conversations
- Sheltered Instructional Strategies
- Math Manipulatives
- Graphic Organizers and Math Visuals
- Mathematical Growth Mindset Approach
